Database Configuration

← Previous   → Next

Added respinola user to existing database in cpanel of godaddy

Database Type *
MySQLi
This is probably "MySQLi".

Host Name *
localhost
This is usually "localhost" or a name provided by your host.

Username *
respinola
Either a username you created or a username provided by your host.

Password
••••••••••••
For site security using a password for the database account is mandatory.

Database Name *
i4439519_jos14
Some hosts allow only a certain DB name per site. Use table prefix in this case for distinct Joomla! sites.

Table Prefix *
utedr_
Create a table prefix or use the randomly generated one. **Ideally four or five characters long, it may only have alphanumeric characters and MUST end in an underscore. Make sure that the prefix chosen is not already used by other tables.**

Old Database Process *
Backup   Remove
"Backup" or "Remove" any existing tables from former Joomla! installations with the same "Table Prefix".
